Lambda with Sorting a List of Dictionaries :

students = [
   {"name": "Ravi", "marks": 85},
   {"name": "Anu", "marks": 92},
   {"name": "Kiran", "marks": 78}
]

students.sort(key=lambda x: x["marks"], reverse=True)
print(students)

OUTPUT:

```
[{'name': 'Anu', 'marks': 92}, {'name': 'Ravi', 'marks': 85}, {'name':
    'Kiran', 'marks': 78}]

=== Code Execution Successful ===
